

Introducing the First **Enterprise-Ready, End-To-End, Biometric Authentication** for the Microsoft Ecosystem

IMAGEWARE®

GoVerifyID®

ENTERPRISE SUITE

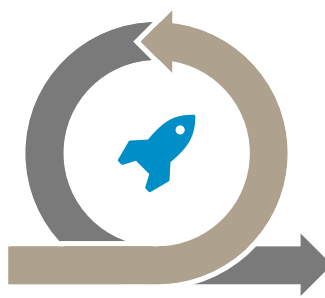

Secure Your Entire Enterprise

ImageWare GoVerifyID Enterprise Suite provides high assurance authentication with unlimited scalability for both mobile and stationary workforces without sacrificing agility or user experience. It's a cost-effective, pay-as-you-go, scale-as-you-need, Software as a Service solution that is easy to install, manage, and operate.

360° Authentication

True enterprise-wide biometric authentication for all stakeholders in all circumstances, connected or disconnected.

Agile

Balances trust and agility; adapts quickly to new biometric technologies; is quick and easy to install, configure, manage, and use.

Cost Effective

Financed as OPEX rather than CAPEX. No upfront cost and requires comparatively low installation and maintenance costs.

THE SERVER COMPONENT

THE CLOUD COMPONENT

THE CLIENT COMPONENT

Breaking all barriers to widespread enterprise adoption.

Cost-effective. Quick to Install. Easy to Manage.

- Integrates seamlessly with **Microsoft Active Directory** and **Microsoft Active Directory Federated Services**
- Provides administration UI via Microsoft Management Console (MMC 3.0) Snap-In
- Provides **Single Sign-On (SSO)** authentication for all Cloud apps managed by ADFS, including the Microsoft Cloud (**Azure**)
- Enables seamless credentialing across Windows-based websites that use AD
- Supports **2FA, MFA**, and strong authentication policies
- Works in concert with the Client and Cloud components

High assurance authentication for all enterprise stakeholders.

Infinite Scalability. Turnkey, Seamless Integration.

- A highly **scalable** Biometric Engine® that stores **hundreds of millions** of biometrics and processes hundreds of millions of transactions
- Supports **all** biometric modalities
- **Anonymous** storage, transaction, and matching of all biometric data
- Standard interface, **SAML 2.0, SCIM 2.0**, and **OAuth 2.0**
- Easy rebranding (white labeling) via HTML 5, with fully open SDK
- Turnkey mobile app in mobile stores
- Turnkey integration with server and client components

The answer to an increasingly mobile workforce.

Secure. Mobile. Flexible.

- **Multi-modal biometric** user authentication for logging into a laptop or tablet, **even when disconnected** from the corporate network
- **Out-of-band, multi-modal** biometric user authentication using smart devices (Apple and Android, smartphones and tablets)
- **In-band biometric user authentication** using any Windows Biometric Framework or compatible device
- Seamlessly works with the **corporate network and Cloud**
- Synergy with the ImageWare GoVerifyID Server and Cloud components to extend the local biometric authentication

Seamless Security

Microsoft Ecosystem Integration

- Easily and seamlessly operates with your existing Microsoft ecosystem to support your extended workforce
- Protects your corporate network from end-to-end
- Secures applications and data on the client, server, and cloud
- Provides flexible user login policies, such as the end user choosing a single biometric or the corporation requiring multiple biometrics for more sensitive use cases
- Leverages the hardware that you already have
- Works with the smart devices that your workforce already has
- Employs authentication techniques well known to your extended workforce (face, fingerprint, and/or voice)
- Deploys quickly and easily as a SaaS
- Provides flexible authentication policies while significantly increasing security

Summary

Hybrid Cloud delivery offers quick deployment and easy maintenance. Our servers are optimized to perform hundreds of millions of biometric authentications across hundreds of millions of identities in real time. In addition, on-premise server installation provides seamless integration with your current Microsoft security infrastructure, with administration via Microsoft Management Console (MMC) and Active Directory (ADFS) Snap-In.

ImageWare GoVerifyID Enterprise Suite provides 360° security to all enterprise stakeholders, employees, non-employee partners, suppliers, vendors, consultants, and customers. It delivers secure enterprise applications and workspaces, inside and outside of the network.

ImageWare (ImageWare Systems, Inc.) is a leader and innovator in multi-modal, multi-factor biometrics, with a long history of successful, large-scale government deployments. With 20 granted patents worldwide and 14 patents pending, we provide the highest level of assurance and accountability for corporate networks, web applications, mobile devices, and PC desktop environments. © 2016 ImageWare Systems, Inc.
